INDIVIDUAL DECORATION  
WITH LARGE AND STRIKING  
STENCILLED PATTERNS

This stencil collection was designed by the interior designer and textile artist **Marie Dreiman**. She has a wide variety of experience in using colours: for example, she has designed colours for building fronts and some well-known Swedish ceramic tiles as well as having coordinated the selection of colours and materials on large office projects. Her interest in using different kinds of patterns can be seen in the paintings and printed fabrics etc. that she has designed.

*“With this collection of stencils, you can freely create individual interiors and liven up walls and fittings. One of the starting points for the design was to create stencil patterns which could be positioned freely, without having to match the patterns’ edges. You can decide by yourself how you want to use them. You can pattern a whole surface, paint just one pattern, or use patterns in groups, just as you find them in nature. It’s easier than you think, and there is no need to worry about failure. If a pattern doesn’t work out, you can simply paint it over. Paint in layers and use both strong and weak contrasts, as we have done in the interior on the cover of this brochure. Combine your favourite colours or use Tikkurila Feelings colour chips. We hope the interiors shown in this brochure will inspire you and provide you with plenty of new ideas.”*

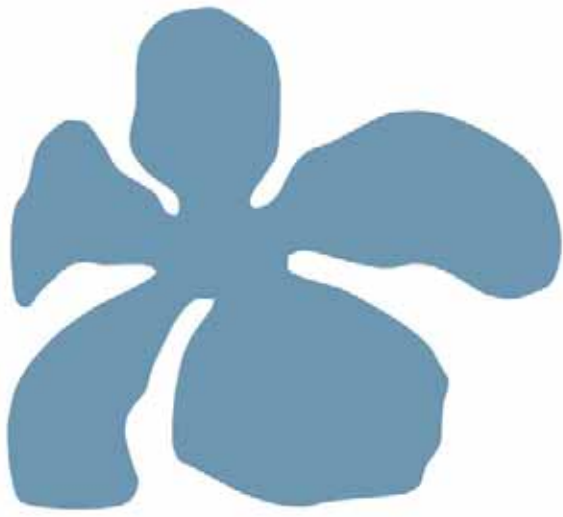

## INDIVIDUAL STENCILLING

The Tikkurila stencil collection includes large and striking stencils which you can use in many different ways. You can pattern entire wall surfaces and create a wallpaper effect or spotlight a particular detail in the room.

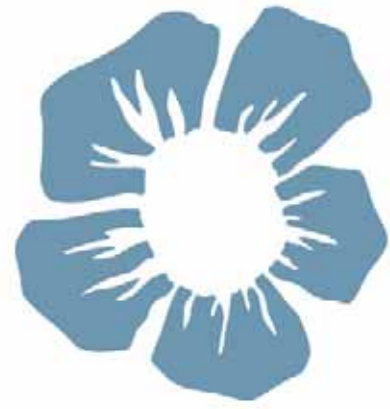

The stencil collection includes different types of patterns which you can use separately or together. By choosing superb colour and/or gloss level combinations for your stencilling, you can easily create a unique result.

Suitable products for wall surfaces are Tikkurila acrylate paints like full matt Feelings Interior Paint and matt Eko-Joker interior paint. You can add striking effects to your stencilling by combining, for example, Feelings Interior Paints and metallic sheen Taika Pearl Paint or glaze. For furnishings, we recommend water-borne Feelings Furniture Paint or Taika Pearl Paint.

Stencilling is quick and easy. There are detailed working instructions inside the stencil packaging. You will also find working instructions on the website [www.tikkurila.com](http://www.tikkurila.com).

## Corona

The sophisticated and delicate Corona is the crowning touch to an interior. The stencil has three identical patterns on it. You can use these alone, in pairs or groups of three.
